Source Consulting Completes Successful Implementation of FTZ Software Integrated with Sage Accpac WMS

Successful implementation of Foreign Trade Zone (FTZ) software integrated with Sage Accpac warehouse management system (WMS) provides Fortessa, Inc. with tremendous efficiency gains and substantial competitive advantage.

Fredericksburg, VA – April 15, 2008 – Source Consulting, Inc. (www.2sci.com), a Sage Software-authorized provider of business management software and CRM solutions, has announced the successful integration of their custom-developed Foreign Trade Zone (FTZ) software solution with Sage Accpac WMS for Fortessa, Inc. Fortessa designs, develops and markets industry-leading tabletop goods and accessories.

According to Scott Hamberger, CEO of Fortessa, "As part of a strategic initiative to become more competitive and project our business in the global marketplace, we decided to establish a Foreign Trade Zone. However we first wanted to make sure we had the proper inventory control and business management systems in place to handle the complexities of administering a FTZ."

Scott turned to Source Consulting to determine how their existing Sage Pro ERP and Sage Accpac WMS could be modified to comply with the strict FTZ data management, reporting, and inventory tracking requirements regulated by US Customs. Source Consulting developed a complete FTZ software solution, integrated with Sage Accpac WMS, that provides the level of inventory detail and operational transparency that Fortessa required.

"Our FTZ warehouse acts as a hub to the world. Our export business is growing robustly and overall, Fortessa is growing 30% annually," says Scott. He adds, "FTZ offers tremendous benefits and has truly transformed our business. We're thankful for our relationship with Source Consulting and the fantastic FTZ software solution they developed."

According to Dane Karcher, President of Source Consulting, "We're proud to have Fortessa as a valued client and grateful for the opportunity to help them leverage the benefits of FTZ to transform their business. It was a challenging, exciting and rewarding project."
